These scales are valid for DNA oligos from 12 to 40 bases without wobbles and modifications. XXL scale oligonucleotides are available with purification by gel filtration or reverse phase HPLC purification. Each oligo will be quality checked by Maldi mass spectrometry. The final amounts are approximate values and valid for a 20mer DNA oligonucleotide with a mixed sequence and not for homopolymers.

**1** The synthesis scale reflects the amount of starting material and not the final yield. The minimum length for scales XS, S, M and XL is 12 bases, for scale L 6 bases. The maximum length for scale XS is 60 bases for scales S, M, L 140 bases, for scale XL 40 bases. Synthesis scale XS is only available with cartridge purification, scales M, L, XL are only available with HPLC purification. Each oligo up to 50 bases is quality checked by Maldi mass spectrometry.

**2** The delivery amounts are valid for mixed sequences and may vary for oligonucleotides with strong secondary structures and homopolymers. The lower yields are guaranteed for a 20mer DNA oligonucleotide.

**3** The price depends on the number of identical modifications per order. Please do not hesitate to contact our customer support for more information.

**4** Prices per modification are valid for single modified oligonucleotides using standard coupling reaction chemistry (NHS ester) and include the HPLC purification of the oligonucleotide. Maximum length for 5'-modified oligos is 80 bases, maximum length for 3'-modified oligos is 45 bases. Longer oligos with end modifications on request.

**5** Prices include DNA oligonucleotide with max. 40 bases, 5'- and 3'-modification, HPLC purification and Maldi control.

**6** Molecular Beacon Probes are characterised by a probing sequence and two arms of 5 - 7 nucleotides at the 3'- and 5'-end of the oligonucleotide being self-complementary to each other; the Molecular Beacon forms a hairpin loop. Prices include DNA oligonucleotide with max. 40 bases, 5'- and 3'-modification, HPLC purification and Maldi control.

**7** Price includes DNA oligonucleotide up to 30 bases, conjugation and PAGE purification.

**8** Prices depend on the scale of oligonucleotides. Information on the concentration adjustment depends on the scale of the oligo and the feasibility.

**9** For >50 oligos per plate, with oligos in columns without gaps. For other plate configurations please ask for prices and instructions.

**10** On all articles except shipping costs.
