qPCR probes with 3'-BMN quenchers from biomers.net (BMN-Q535, BMN-Q620, BMN-Q1 and BMN-Q2) from only 74,90 EUR

Select the optimal combination for your qPCR. A set of inexpensive probes with many well-established fluorophore/quencher combinations allows multiplexing on all popular devices.

## More offers for qPCR probes can be found on our website at [www.biomers.net](http://www.biomers.net).

Many further fluorophore/quencher combinations are available, e.g. with Atto- and Dyomics dyes. Using our online ordering system, you can easily select your desired combinations. If you need assistance, please contact our biomers.net support team:

Tel +49 731 70 396 0 | [info@biomers.net](mailto:info@biomers.net)

\* The prices are valid for an oligonucleotide (max. 30 bases) in scale S (guaranteed yield > 10D) with the respective dye-quencher-combination, including HPLC purification and MalDI quality control. Prices are only valid for electronic orders (biomers.net online order form). VAT, shipping costs and duties may apply. Additional conditions are according to our current price list. Prices may change without further notice. Errors excluded. The prices cannot be combined with other discounts apart from the "Early Bird Discount".
